

Evaluation of the vitamin D3 supplementation on the profile of vitamin D metabolites in women with Hashimoto thyroiditis?

Rafał Rola¹, Ewa Trusewicz², Konrad Kowalski¹

¹ Laboratorium Diagnostyczne Masdiag, Masdiag Sp. z o.o., ul. Żeromskiego 33, Warszawa

² Poradnia dietetyczna - Dieta i Fitness, ul. Puławska 117/8, Warszawa

April 2017

Hashimoto thyroiditis (n= 56)
25(OH)D₃ 19,2±7,9 ng/mL

Control group (n= 41)
25(OH)D₃ 17,1±7,6 ng/mL

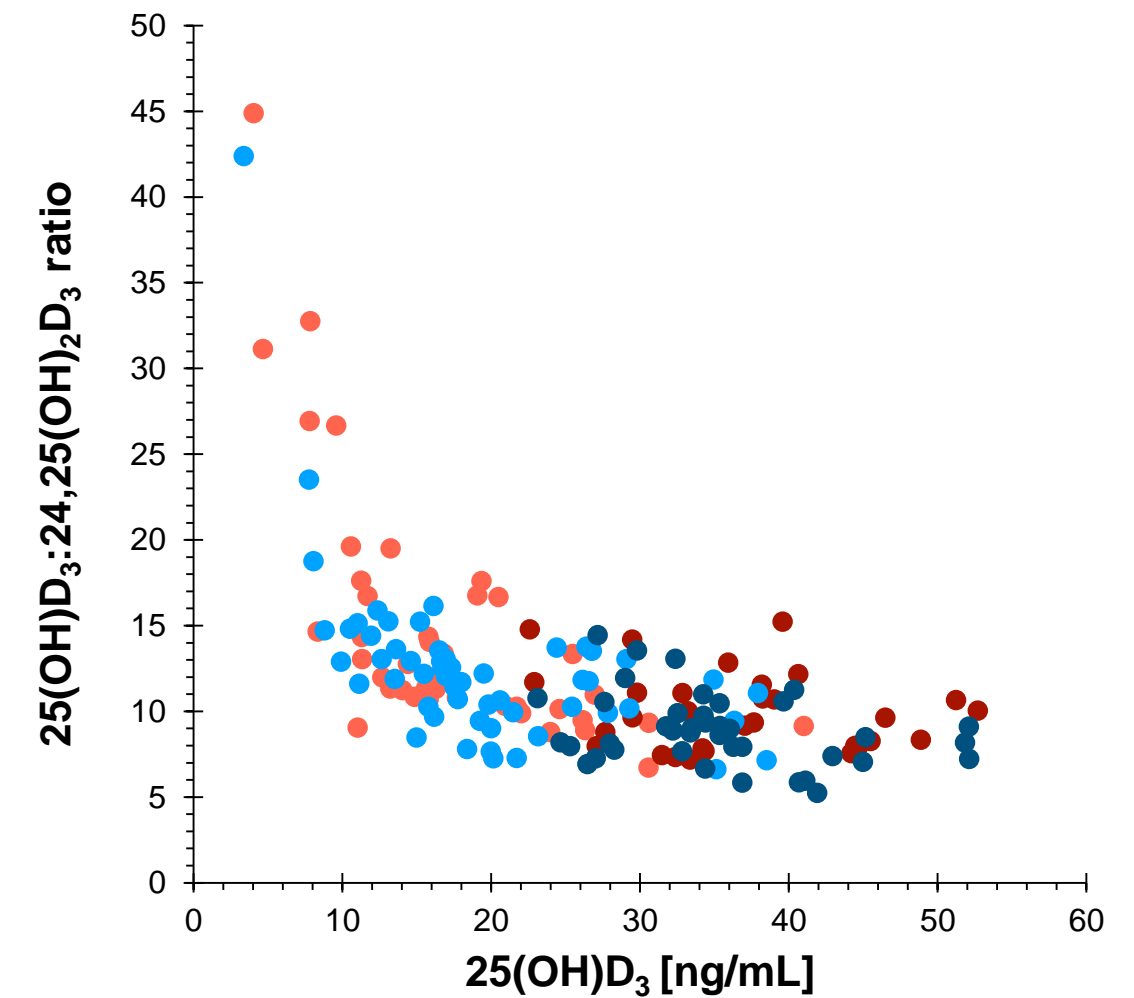

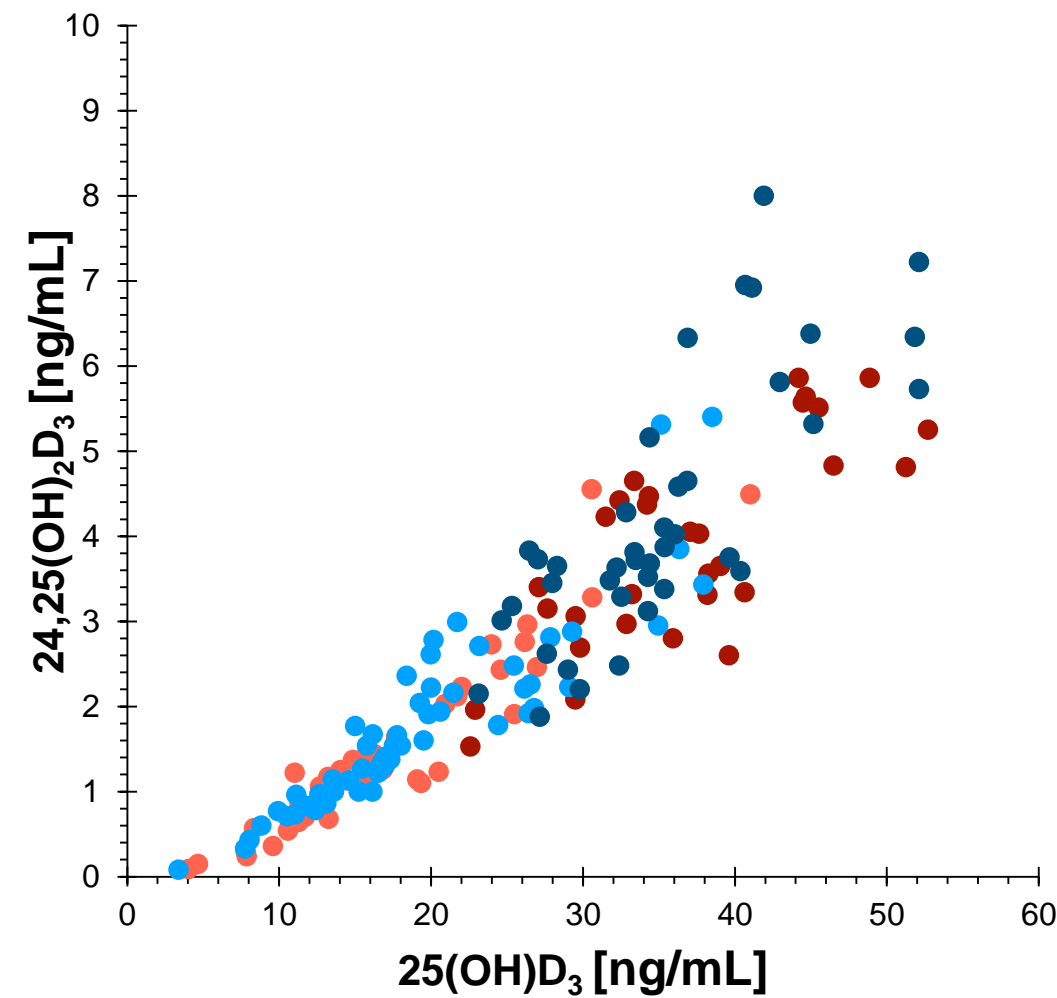

**Supplementation
4000 vitamin D₃ unit/day**

June 2017

Hashimoto thyroiditis (n= 44)
25(OH)D₃ 35,9±8,4 ng/mL

Control group (n= 32)
25(OH)D₃ 36,9±7,9 ng/mL

Correlation between 25(OH)D₃ and 24,25(OH)₂D₃

Correlation between 25(OH)D₃ and epi-25(OH)D₃
